

Trustee Meeting Update: New Equipment Hire Initiative! We want to share the key decisions from the Trustees' Quarterly AGM, held on September 30th.

Moving Forward, The Trustees formally noted that we lost the site for the eco-garden back in February. While we're sad to see that project end, we've found a fantastic way to put the remaining assets to work for our mission!

Launch of Equipment Hire We have a considerable amount of useful equipment left over from the eco-garden, and the Trustees have unanimously agreed to a new fundraising plan: we'll be hiring this equipment out to the community!

This initiative achieves two important goals:

It directly supports our donation platform by generating new, reliable income.

It allows us to share valuable tools with our community members.

Ready to Go! To ensure the process is clear and professional, a formal written hire agreement has been finalised and approved. We are now preparing to launch this service!

Keep an eye on this space and our social media channels for details on what equipment is available and how you can hire.
